“Bag filter factory Ltd” was founded in 1997.

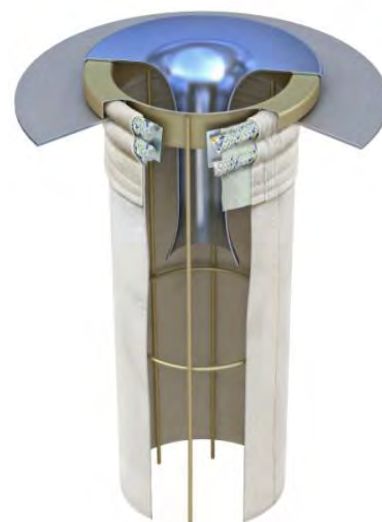

Director Alexander Yaroshenko, is not only a successful organizer, but also is the author of unique scientific and industrial developments, 20 of which are proved by patents of Ukraine, the Russian Federation, Kazakhstan and Belarus. Today “Bag filter factory Ltd” is one of the leading companies in the manufacture of removable filter elements (production of bag, bag filters, filter sectors), as well as filter systems: industrial plant cleaning gases and dust, ventilation and air conditioning systems, liquid filtration.

Our company is constantly engaged in research and development of new filter technology has its TU 23.1 31700904-002-2012 "The sleeve of the glass filter fabrics" and TU 17.5-31700904-001:2009 "Filtering sleeves" introduced for the first time in Ukraine, registered in the State Standard of Ukraine. Developments are protected by patents.

“Bag filter factory Ltd” certified ISO 9001 quality system. In many countries, a certificate of quality management system according to ISO 9001 is an indicator of competitive ability of the company not only at national but also at international level. This is another sign of the quality of our products, an additional guarantee of reliability.

Many of the leading enterprises of Ukraine, Russia and CIS countries have become our regular partners. We also supply our products to many countries around the world.

Thanks to a high product quality achievement and individual approach to solving the client's interests, the company has established itself as a stable and reliable manufacturer.

INDUSTRY APPLICATIONS filter element:

- Production of carbon
- The steel industry
- Cement and ferroalloy industry
- Sugar Factory
- Mining and Minerals
- Chemical and petrochemical industry
- Asphalt production
- Flour-and-cereals industry
- Glass and porcelain industry
- Food

- Pharmaceutical industry
- Tobacco Factory
- Power plants
- Waste recycling plant

Our services:

- Selection and delivery of filter systems like “Filter bag” impulse regeneration with productivity from 1660 m³/h till 1100000 m³/h according to customer's specifications;
- Examination of production and technical process with the definition of qualitative and quantitative components of the cleaned gases with the issuance of the necessary acts and conclusions;
- Redesign, modernization of Filter systems for Filter bag systems impulse regeneration, which are obsolete and are subject to overhaul;
- Determination of qualitative and quantitative composition of the dust and the selection of the filter cloth;
- Survey of the Filter systems for residual dust content out of the filter housing.

Our customers are the leading metallurgical enterprises of the CIS.

Production capacities allow to produce more than 110 000 thousands of Filter bags per year.

Selling of Filter bags and metal cages were performed in the following countries:

- Russian Federation
- Kazakhstan
- Belarus
- Estonia
- Uzbekistan
- Guatemala

“Bag Filter Factory Ltd” is interested in selling its products in the markets of Europe, North and South America.

We are interested in tenders for purchase of different filter elements, like: bags and cages to them, pockets filter, sector for vacuum filters, cloth for filter presses, filter felts and fibers for dust and gas purification, and for liquid filtration
